SOUND & ACOUSTICS

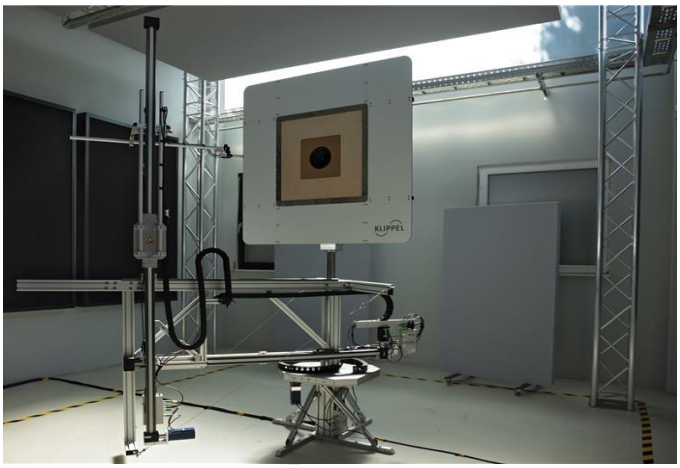
CONNECTIVITY & USER EXPERIENCE

YOUR GLOBAL MOBILITY AND INDUSTRY ENGINEERING EXPERTS

We are your competent partner in the sound & acoustics field. With our team of experts in Ingolstadt and the support of the entire EDAG network, we are able to offer you an extensive portfolio of audio and acoustics-related engineering and validation services.

In the process, we can draw on 18 years' experience and know-how in the development of sound systems and their components.

Taking initial concept studies as our basis, we work with you to develop functional solutions specially tailored to your requirements. We see the development process through to the successful implementation of the product and then beyond.



Main fields of development:

- Entertainment sound tuning
- Announcement sound tuning (SDS, navigation, telephony)
- Audio component development
- Speaker development and fully comprehensive validation
- Software development & validation
