

# LOGISTICS PLANNING

**Logistics planning** is the key factor in securing the smooth running of the SMART FACTORY. EDAG Production Solutions provides complete developments for sustainable production systems, and is the ideal interface between product development and plant construction.

## YOUR GLOBAL MOBILITY ENGINEERING EXPERTS

### Range of services – supply chain excellence

We offer you all-round expertise in the areas of production and trade, along with in-depth process know-how: this makes EDAG your ideal **logistics planning** partner. We know that with the supply chain, you can win everything - but also lose everything. Together, we develop a supply chain strategy that helps you to generate competitive advantages by balancing your customers' requirements with the optimal design of your supply chain. We call this 'supply chain excellence by EDAG'.

### Smart logistics via the end-to-end solution

- Strategic development of logistics and supply chain
- Planning, design and optimisation of the logistics processes
- General planning for automated intralogistics
- Logistics processes of autonomous transport systems
- Simulation of logistics processes
- Digital transformation of the logistics and supply chain

### Your advantages with logistics planning:

- Increased efficiency in the logistics processes
- Improved security of supply
- Reduction of process costs and response times
- Adaptability to future challenges
- Supply chain sustainability
