

MILITARY COMMERCIAL VEHICLES

DEVELOPMENT OF LOGISTICAL AND TACTICAL WHEELED VEHICLES

YOUR GLOBAL MOBILITY ENGINEERING EXPERTS

The **EDAG DEFENCE** team, a specialist department in the **EDAG Group**, develops heavyweight **logistical and tactical wheeled military vehicles**, but also **government and special-purpose vehicles**.

As well as developing **components, modules and complete vehicles**, we also manufacture **prototype parts and vehicles**, which we subsequently validate, either using our own **test systems or in test mode at test centres**.

With our high degree of **flexibility** and **outstanding engineering quality** - and not least because we are familiar with the special standards required for military vehicles - we have developed into a reliable engineering partner in this sector.

We will be happy to assist you with the efficient execution of future challenges and projects.
