Silver Medal in EcoVadis Sustainability Ranking

The EDAG Group is among the top 25 percent of the companies assessed by EcoVadis

2.12.2021 For engineering service provider EDAG, sustainability is one of the central aspects of its economic and social activities.

Motivated by this principle, the EDAG Group has been undergoing annual certification by the renowned EcoVadis institute since 2019.

The international company offers leading solutions for monitoring sustainability in global supply chains, and in the last year has inspected and assessed more than 75,000 national and international companies.

The EDAG Group has this year been awarded the silver EcoVadis medal on the strength of its renewed improvement in performance. This result places the company among the top 25 percent of the companies assessed by EcoVadis.

"We are delighted to have been awarded the silver medal - a visible reward for the commitment of our company to sustainable solutions," underlines Cosimo De Carlo, CEO of the EDAG Group. "In the last few years, we have launched numerous initiatives addressing all aspects of sustainability.

At one and the same time, therefore, this award is both an incentive and a challenge to keep on promoting sustainability within the company and in our development projects for modern mobility concepts. Because I am convinced that sustainability not only generates a competitive edge, but is at the same time the basic requirement for securing the existence and economic development of the mobility industry."

About **EDAG**

EDAG is an independent engineering service provider working for the global automotive industry. The company has a global network of some 60 branches at the world's major automobile centres to serve leading national and international vehicle manufacturers and technologically discerning automotive suppliers. In addition, EDAG also offers engineering services in the vehicle engineering, electronics/electronics and production solutions segments. This extensive competence enables EDAG to provide its customers with all-round support, from the original idea to design, through to product development, prototype construction and even turn-key production systems. As an innovative technological leader, the company also has competence centres for ground-breaking future technologies for the automotive industry: sustainable vehicle development, safe mobility, digitalisation and drive and storage technologies. In 2020, the company generated sales of 650 million euros in the core business. On 31 December, 2020, EDAG employed a global workforce of 7,984 (including apprentices).
